

Sunny Side Up Show: Episode 4:
Fraction Action

Your Name _____ Date _____

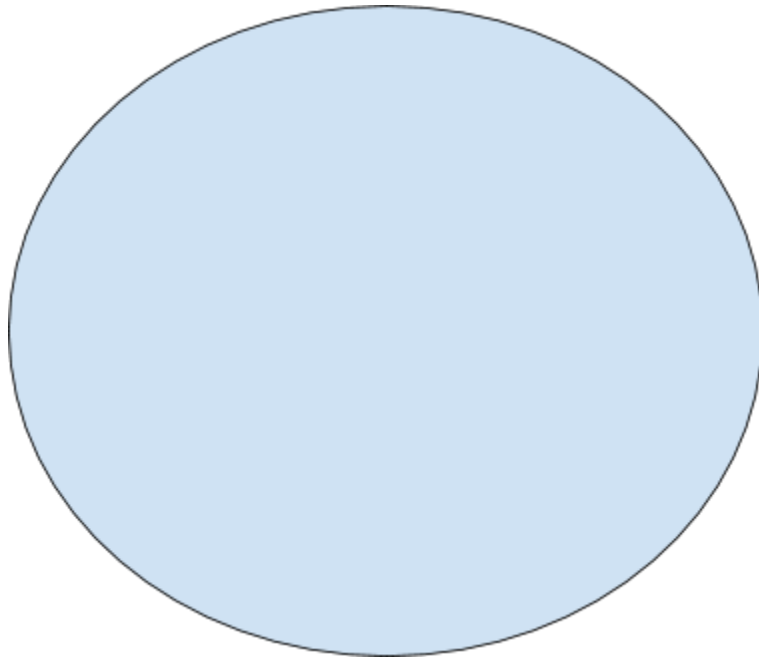

Little D and Bayje are talking about fractions today. They are using pizza for their example. Have you had pizza? If so, what are your favorite toppings? If not, what food do you like that is also round?

Handwriting practice area with five sets of dashed lines for writing.

Draw your pizza below. Make sure to add your toppings.

Now divide your pizza into 8 equal parts. Equal means the same size.

Who would you share your pizza with and what fraction of the pizza would they have? Example: 1 slice for Bayje = $\frac{1}{8}$ of the whole pizza. Label their names on your pizza above.
